

SUPPLEMENT
TO THE
MONTHLY AND QUARTERLY RETURNS
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED IN
SCOTLAND
DURING THE YEAR
1898;
ALSO THE
VACCINATION RETURNS
RELATIVE TO THE CHILDREN BORN DURING
1897.

PUBLISHED BY AUTHORITY OF THE REGISTRAR-GENERAL.

GLASGOW: PRINTED BY JAMES HEDDERWICK & SONS
FOR THE REGISTRAR-GENERAL OF BIRTHS, DEATHS, AND MARRIAGES.

1899.

REPORT.

Herewith is submitted the Report containing the usual details as to the Births, Deaths, and Marriages registered throughout Scotland during the year 1898 in the 1071 Registration Districts into which it is divided. There is also submitted the Thirty-fourth Report on Vaccination, in which all the available information is given in respect to the working of the Scottish Vaccination Act, and especially in relation to the vaccination of children born in Scotland during the year 1897.

TABLE I.—Population estimated to the middle of each year, with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1898, and their Proportion to the Population; also the Excess of Births over Deaths, the Number of Illegitimate Births, and their Proportion to the Total Births.

YEAR.	Estimated Population	BIRTHS.		DEATHS.	MARRIAGES.	Excess of Births over Deaths.	Percentage to Population.			Percent of Illeg. to Total Births.

proportions which, when compared with the corresponding ratios for the previous year, indicate an increase in the case of the births and marriages, and a decrease in that of the deaths (Table I.).

The excess of births over deaths is 52,473.

BIRTHS.

Of the 130,879 births recorded the rate per ten thousand of the estimated population is 308, or 3·08 per cent.; 66,850 of the births were of males and 64,029 of females.

Tables IV. and V. give the number of births in each of the five groups of districts into which the country is primarily divided, and their respective rates to the estimated population of each. In the Principal Town districts the births number 56,514, being at the rate of 3·23 per cent. of the estimated population; the males number 28,736, the females 27,778. In the Large Town districts the number of births is 18,452, or 3·25 per cent. of the population; males being 9458, females 8994. In the Small Town districts the births are 28,135, or 3·14 per cent. of the population of the same; males 14,407, females 13,728. In the Mainland-Rural districts the number is 25,024, equivalent to 2·74 per cent. of the population as estimated; the males 12,827, the females 12,197. In the Insular-Rural districts the births are 2754, corresponding to 2·26 per cent. of the estimated population, the males numbering 1422, the females 1332.

Of the total 130,879 births, 8914, or 6·8 per cent. of all, are illegitimate. The rate of illegitimacy in the several districts is 6·4 per cent. in the Principal Town districts, 5·4 per cent. in the Large Town districts, 6·7 per cent. in the Small Town districts, 8·9 per cent. in the Mainland-Rural districts, and 5·0 per cent. in the Insular-Rural districts.

Table VI. shows the rate of illegitimacy in the eight geographical divisions into which Scotland is divided, and in each county. In the former the highest rate—of 12 per cent.—occurs in the North-Eastern division, followed by the Southern with a rate of 11·3 per cent., the

occurs in Caithness, where it is 13·2 per cent., in Banff 13·3 per cent., and in Wigtown 15·8 per cent. The lowest rate is in Bute, 4·1 per cent., and in Shetland 4·0 per cent. In ten of the counties the rate is 10·0 per cent. or over.

Of the 130,879 births, 66,850 are males and 64,029 females, being at the rate of 104·4 of the former to every 100 of the latter. In the Principal Town districts 103·4 males were born to every 100 females; in the Large Town districts and Mainland-Rural districts they were the same, 105·2 males to every 100 females; in the Small Town districts the proportion was 104·9 males to every 100 females; and in the Insular-Rural districts it was as 106·8 is to 100.

During January 10,773 births were recorded, during February 9511, during March 11,356, during April 11,418, during May 11,674, during June 11,352, during July 11,034, during August 11,269, during September 10,507, during October 11,213, during November 10,170, and during December 10,602.

DEATHS.

78,406 deaths were registered throughout Scotland during 1898: of these 39,371 are males, and 39,035 females. The death-rate for Scotland was 184 in every ten thousand of its estimated population, or 1·84 per cent.

In the Principal Town districts, the rate is 202 per ten thousand of its inhabitants; in the Large Town districts it is 189 in like proportion; in the Small Town districts it is 174; in the Mainland-Rural districts it is 162; and in the Insular-Rural districts it is 151.

The number of deaths registered during January is 6569, during February 5970, during March 7802, during April 7248, during May 6978, during June 6267, during July 5919, during August 6374, during September 6259, during October 6340, during November 6162, and during December 6518.

MARRIAGES.

32,096 marriages were registered throughout Scotland during 1898, being at the rate of 76 per ten thousand of the population as estimated, or 0·76 per cent. In the Principal Town districts the rate is 93 in every ten thousand of the inhabitants of the same; in the Large Town districts it is 75; in the Small Town districts it is 70; in the Mainland-Rural districts it is 54; and in the Insular-Rural districts the rate is 34.

The number of marriages registered during January is 4045; during February it is 1602, during March 1646, during April 2215, during May 1068, during June 4879, during July 3783, during August 2121, during September 2002, during October 2198, during November 2150, and during December 4387.

EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND.

The following remarks are made with reference to events which occurred in Eight of the Principal Towns of Scotland, viz., Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, and it is assumed that facts relating to them will also be found to apply to a considerable extent to the surrounding districts.

BIRTHS IN EIGHT OF THE PRINCIPAL TOWNS.

49,861 births were registered in these towns during the year, giving a birth-rate of 3·18 per cent., or 318 in every ten thousand of the estimated population. The highest birth-rate occurs in Greenock, 352 per ten thousand of its population; followed by Glasgow with a rate of 335 in like proportion, Aberdeen and Leith each with a rate of 332, Paisley with one of 317, Dundee with one of 301, Edinburgh with one of 274, and Perth with one of 264.

46,421 of the births were legitimate and 3440 illegitimate; the illegitimate thus constituting 6·9 per cent. of the whole. In Dundee 9·2 per cent. of the births were illegitimate, in Aberdeen 8·7 per cent., in Edinburgh 7·4 per cent., in Perth 7·3 per cent., in Glasgow 6·4 per cent., in Paisley 5·9 per cent., in Greenock 5·2 per cent., and in Leith 4·9 per cent. Table VIII. also gives the ratio of illegitimate births to the possible mothers—*i.e.*, spinsters and widows between the ages of 15 and 45 years—in these same towns. Thus in Aberdeen the rate was 1·83 per cent., in Dundee it was 1·64 per cent., in Glasgow 1·57 per cent., in Greenock 1·49 per cent., in Leith 1·42 per cent., in Perth 1·21 per cent., in Paisley 1·19 per cent., and in Edinburgh 1·14 per cent.

The number of male births in these towns during the year is 25,366, and of female 24,495, there thus being 103·5 male infants born for every 100 female.

DEATHS IN THESE EIGHT TOWNS.

32,153 deaths are registered as occurring in these towns during 1898, giving a mortality-rate of 2·05 per cent., or 205 in every ten thousand of the estimated population. Table VIII. shows the highest rate to be in Greenock, where 214 in every ten thousand of its inhabitants succumbed during the year; followed by Glasgow, where the rate is 212, in Dundee and Paisley it is 210, in Perth it is 205, in Edinburgh it is 196, in Aberdeen it is 191, and in Leith it is 179. Table IX. allows of a comparison being made between those rates and the corresponding for 1897, and also the mean for a decennium. The rate for the present year shows a decrease in the case of Glasgow, Edinburgh, Leith, Greenock, and Perth when compared with what it was in these towns last year, while an increase has taken place in the others.

TABLE VII.—Births, Deaths, and Marriages, and their Proportion to the Population, in Eight Principal Towns of Scotland, during each of the Years 1855–1898.

YEARS.	Population estimated to the middle of each year.	BIRTHS.		DEATHS.		MARRIAGES.

Perth	80,623	808	2.64	4,863	59	7.3	1.21	628	2.05	306	1.00

The mortality among children under five years of age is given in Table X. The estimated number of children living, under five years of age, in the towns is 190,931, and the number of deaths at the same age is 12,754, the rate of mortality being 67 per thousand. In Dundee the rate is 75 per thousand, in Glasgow it is 71, in Greenock it is 64, in Aberdeen it is 63, in Paisley it is 62, in Edinburgh it is 59, in Leith it is 55, and in Perth it is 49 per thousand. This Table also shows that of every hundred deaths in Glasgow 43 were of children under five years of age, in Dundee 42, in Aberdeen and in Leith 40, in Paisley 39, in Greenock 38, in Edinburgh 32, and in Perth 26.

Tables XI. and XII. afford a view of the mortality due to each class of disease and to a selection of the more prominent and important causes of death in each of these eight towns, such mortality being calculated, firstly, with reference to the estimated population of each town, and secondly, with reference to the total mortality from all causes, allowance being made for the causes of death not specified.

The percentage of deaths from Zymotic diseases was 0·322 on the total estimated population of the Eight Principal Towns dealt with, being 15·69 per cent. of the total registered deaths. The proportion of deaths from those diseases to every hundred of the population was—in Paisley 0·403, in Glasgow 0·359, in Greenock 0·343, in Dundee 0·329, in Aberdeen 0·263, in Edinburgh 0·262, in Perth 0·227, and in Leith 0·209. The relative percentages of the total deaths attributed to Zymotics was—19·22 in Paisley, 16·75 in Glasgow, 16·06 in Greenock, 15·13 in Dundee, 13·77 in Aberdeen, 13·37 in Edinburgh, 11·72 in Leith, and 11·06 in Perth.

TABLE X.—Deaths of Children under Five Years of age in each of Eight of the Principal Towns of Scotland during the Year 1898.

TOWNS.	Estimated Number of Living Children under 5 years in 1898.	Deaths under 5 years of age.	Percentage of Deaths under 5 years.	Percentage of Deaths under 5 years to the Total Deaths.
Glasgow	91,861	6,530	7·11	42·6
Edinburgh	81,708	1,873	5·91	32·3
Dundee	19,262	1,453	7·54	42·0
Aberdeen	17,244	1,031	6·27	40·3
Leith	9,893	547	5·53	40·2
Paisley	9,843	610	6·20	38·5
Greenock	7,729	495	6·40	37·8
Perth	3,891	165	4·27	26·3

Of every hundred deaths in Glasgow 4·59 were attributed to Hooping Cough, 3·53 to Measles, 3·15 to Diarrhœa and Dysentery, 1·45 to Fevers (1·37 of these being Typhoid), 1·24 to Scarlet Fever, 0·73 to Influenza, and 0·68 to Diphtheria.

In Edinburgh, 2·80 per cent. of all the deaths was due to Diarrhœa and Dysentery; 2·42 to Measles; 2·19 per cent. to Hooping Cough; 1·76 per cent. to Influenza; 1·50 per cent. to Scarlet Fever; 0·78 per cent. to Diphtheria; and 0·73 per cent. to Fevers (0·54 being Typhoid or Enteric, and 0·16 Typhus).

In Dundee, 4·44 per cent. of the deaths was due to Diarrhœa and Dysentery; 4·03 per cent. to Measles; 2·58 per cent. to Hooping Cough; 1·28 per cent. to Scarlet Fever; 0·99 per cent. to Influenza; 0·81 per cent. to Diphtheria; and 0·46 per cent. to Fevers (0·20 Typhus and 0·26 Typhoid).

In Aberdeen, 3·94 per cent. of the total mortality was ascribed to Hooping Cough; 2·85 per cent. to Diarrhœal Affections; 1·43 per cent. to Scarlet Fever; 1·31 per cent. to Influenza; 1·24 per cent. to Diphtheria; 0·79 per cent. to Measles; and 0·60 per cent. to Fevers (0·08 Typhus, and 0·53 Typhoid).

In Leith, 4·42 per cent. of the deaths are due to Diarrhœa and Dysentery; 1·99 per cent. to Measles; 1·33 per cent. to Hooping Cough;

0·66 per cent. to Influenza and to Diphtheria; 0·59 per cent. to Fevers (all Enteric); and 0·44 per cent. to Scarlet Fever.

In Paisley, 6·32 per cent. of the mortality was due to Hooping Cough; 4·49 per cent. to Diarrhœal Affections; 2·78 per cent. to Fevers (0·06 Typhus, 2·59 Typhoid); 2·21 per cent. to Measles; 1·71 per cent. to Influenza; 0·82 per cent. to Diphtheria; and 0·38 per cent. to Scarlet Fever.

In Greenock, 4·48 per cent. of the deaths is ascribed to Diarrhœa and Dysentery; 3·01 per cent. to Hooping Cough; 1·85 per cent. to Scarlet Fever; 1·78 per cent. to Fevers (0·08 Typhus, and Simple Continued, 1·62 Enteric); 1·31 per cent. to Diphtheria; and 0·85 per cent. to Measles and to Influenza.

In Perth, 2·44 per cent. of the deaths is due to Diarrhœa and Dysentery; 1·63 per cent. to Hooping Cough; 1·46 per cent. to Scarlet Fever; 1·30 per cent. to Influenza; 0·98 per cent. to Measles; 0·65 per cent. to Diphtheria; and 0·49 per cent. to Fevers (all Typhoid).

In these eight towns collectively, Hooping Cough was the cause of 1198 deaths during the year, or 3·76 per cent. of the deaths from all causes, and 7·7 deaths for every ten thousand of estimated population. Diarrhœa and Dysentery caused 1073 deaths, being 3·36 per cent. of the deaths from all causes, and 6·9 deaths out of every ten thousand of the estimated population. To Measles, 914 deaths were ascribed, constituting 2·86 per cent. of the gross mortality, and 5·9 out of every ten thousand of the inhabitants of those towns. Scarlet Fever caused 402 exits, equal to 1·26 per cent. of

TABLE XII.—Percentage of Deaths from different Diseases to the Total Deaths in each of Eight of the Principal Towns of Scotland during the Year 1898, allowing for the Causes of Death not specified.

the total mortality, and equal to 2·6 deaths of the population as above. Fevers together caused 387 deaths, at the rate of 1·21 per cent. of all deaths, and 2·5 in every ten thousand of the population. Of this number, Typhus caused 28 deaths, Typhoid or Enteric 350, Simple Fever 7, and 1 each from Relapsing and Cerebro-Spinal Fever. To Influenza 336 deaths are due, equal to 0·95 per cent. of all, and 2·1 in every ten thousand of population. Diphtheria caused 252 deaths, at the rate of 0·79 per cent. of the total, and 1·6 in every ten thousand of the population as estimated.

From Small Pox a single death is registered in Leith.

Zymotic diseases together caused 5004 deaths in these same towns, equal to 15·69 per cent. of the total mortality, and 32·2 deaths per ten thousand of the inhabitants thereof. Syphilis caused 147 deaths, Erysipelas 73, and Puerperal Fever 88.

Constitutional Diseases caused 6057 deaths, at the rate of 18·99 per cent. of all deaths, and 38·9 in every ten thousand of population. Rheumatism and Rheumatic Fever caused 155 deaths. Cancer caused 1296, being at the rate of 4·06 per cent. of all, and equal to 8·2 deaths for every ten thousand of population; the highest rates from Cancer occur in Edinburgh, Dundee, and Aberdeen. Gout caused 5 deaths. To Phthisis, 2985 persons fell victims, being 8·36 per cent. of all the deaths, and 19·2 deaths per ten thousand of population; the highest rate from this occurred in Greenock, Dundee, Leith, and Glasgow. Tabes Mesenterica caused 432 deaths, Tubercular Meningitis 607, and other Tubercular Diseases 325.

Diseases of the Nervous System caused 3601 deaths, thus constituting 11·29 per cent. of all, and 23·1 deaths in every ten thousand of the population. In Glasgow the rate was 23·0 per ten thousand, in Edinburgh 23·6, in Dundee 19·7, in Aberdeen 23·7, in Leith 18·2, in Paisley 26·1, in Greenock 28·6, and in Perth 31·3. To Inflammation of the Brain 758 deaths are ascribed, to Apoplexy 1175, to Paralysis 560, and to Convulsions 607.

Diseases of the Circulatory Organs caused 2725 deaths, equivalent to 7·54 per cent. of all the deaths, and 17·4 per ten thousand of the population. In Glasgow deaths from these diseases occur in the ratio of 15·6 per ten thousand of its inhabitants; in Edinburgh the rate is 21·6; in Dundee it is 19·2; in Aberdeen it is 16·9; in Leith it is 15·8; in Paisley it is 15·1; in Greenock it is 20·6; and in Perth it is 19·7.

Diseases of the Organs of Respiration are the cause of 6004 deaths, which gives a mortality-rate of 18·82 per cent., and equal to 38·6 deaths in every ten thousand of the population. In Glasgow 43·0 per ten thousand of its inhabitants thus succumbed, in Edinburgh 31·9 did so, in Dundee 42·3, in Aberdeen 33·8, in Leith 34·1, in Paisley 32·9, in Greenock 35·0, and in Perth 34·3. Croup caused 71 deaths in these towns, Bronchitis 2590, and Pneumonia 2735.

Diseases of the Digestive Organs caused 2365 deaths, at the rate of 7·31 of all, or 15·2 in every ten thousand of the inhabitants so died. Enteritis caused 750 deaths, Peritonitis 306, Dentition 216, and Diseases of the Liver 314.

From diseases of the Urinary Organs there were 833 deaths, being 2·61 per cent. of the gross mortality from all causes, and 5·2 deaths out of every ten thousand of population. Nephritis caused 266 deaths, Bright's Disease 306, and Diseases of the Bladder and Prostate 110.

Premature Birth accounts for 961 deaths. Congenital Malformations for 205, and Old Age for 1110.

To Child Birth 141 deaths are ascribed, in addition to which there were 88 deaths attributed to Puerperal Fever.

From Atrophy and Debility there resulted 961 deaths; from Dropsy 20; and from causes which were so ill-defined as not to be specially classified, 250.

Deaths from Violence number 1235, being at the rate of 3·77 per cent. of the whole, or 7·9 per ten thousand of the population. Of these, 1152 were due to Accident or Negligence, 7 to Homicide, 75 to Suicide, and there was 1 Judicial Execution. The causes of death from Suicide were: Hanging in 29 cases, Cut Throat in 23, Drowning in 8, Gun-shot in 6, Precipitation in 5, Poison in 3, and by Railway 1.

107 deaths were attributed directly to Intemperance.

34 males and 77 females were aged 90 years and upwards at death, the oldest being a widow at 105 years.

MARRIAGES IN EIGHT PRINCIPAL TOWNS.

14,836 marriages were registered in these towns during the year, being at the rate of 95 for every ten thousand of the population as estimated. In Perth the marriage rate was 100 per ten thousand of its inhabitants; in Edinburgh 99; in Glasgow 99; in Aberdeen 97; in Paisley 92; in Greenock 86; in Leith 82; and in Dundee 78.

WEATHER AND ITS INFLUENCE ON MORTALITY.

The following remarks on the weather of the year are extracted from the Notes made by Dr. Buchan, under the direction of the Council of the Scottish Meteorological Society, which appear in the Registrar-General's Monthly Reports:—

January was characterised by a very high mean barometric pressure, accompanied with an unusually low monthly range; a mean temperature higher than any that has hitherto occurred in January, with nearly the average daily range of temperature; a low, mean humidity; a small rainfall, falling on two days fewer than the average; and an extraordinary excess of west and south-west winds, these respectively two and five days in excess of the average of these directions.

February was characterised by a very low mean barometric pressure, with a monthly range also very low; a mean temperature nearly half a degree, and a mean daily range nearly a degree above the average; an exceptionally low mean humidity, being the third lowest recorded during the past forty-two years, the absolutely lowest being 78 in 1895, and the next 79 in 1858; a mean rainfall under the average falling on one day more than the average; a quite unusual excess of westerly and deficiency of easterly winds, blowing with a force only once exceeded since 1856, viz., in 1868, when it reached the high figure of 3·57 lbs. to the square foot.

March was characterised by a rather high barometric pressure, with an unusually low monthly range; a mean temperature nearly half a degree above the average, with a mean daily range also about half a degree above the average; a rather low humidity; a very low mean rainfall, falling on

one day less than the average, and two days' excess of westerly and one of northerly winds, blowing with greater force than usual.

April was characterised by a rather low barometric pressure, with a very low monthly range; a remarkably high mean temperature with a

mean daily range decidedly under the average; an average humidity; a mean rainfall, larger than any that has occurred in April since 1880, and falling on four days more than the average; and five days' excess of southerly winds, blowing with the average force of the month.

May was characterised by a rather low barometric pressure, with an unusually large monthly range, the range being only exceeded by the Mays of 1877 and 1881; a mean temperature fully a degree under the average, with a mean daily range slightly above it; a low humidity; a mean rainfall a little above the average, falling on fifteen days, or one day above the average.

June was characterised by a mean barometric pressure slightly under the average, with a rather large monthly range; a mean temperature nearly the average, with a mean daily range considerably above the average; a mean humidity about the average; a mean rainfall less than the average, falling on the average number of days; and two days' excess of southerly winds.

July was characterised by a mean barometric pressure very largely in excess of the average, with a very small monthly range; a mean temperature about the average, with a mean daily range very large, having been exceeded during the forty-three years only in 1868, when it was 17°2; a mean humidity extraordinarily low, nothing lower having occurred since 1857; one of the lowest mean rainfalls hitherto recorded, falling on six days fewer than the average; a four days' excess of north-westerly winds, blowing with a force considerably above the average.

August was characterised by a mean barometric pressure a little above the average, with a monthly range a little under the average; a mean temperature about a degree above the average, with a mean daily

range very considerably above the average; a mean humidity slightly under the average; a mean rainfall fully the average of August, falling on one day more than the average; and a three days' excess of southerly winds, blowing with a force greater than any recorded for the month since 1886.

September was characterised by a mean barometric pressure considerably above the average, with an exceedingly small monthly range, no smaller having been previously recorded, except in September 1894; a mean temperature very largely in excess of the average, with a mean daily range correspondingly large; a mean humidity nearly the average; a mean rainfall nearly the average, but falling on two days fewer than the average; four days' excess of southerly winds, with the lowest mean force hitherto recorded, except in 1876, when it was slightly smaller.

October was characterised by a mean barometric pressure nearly the average, with a monthly range only slightly under the average; a mean temperature almost unprecedentedly high for October, with a mean daily range about a degree and a half under the average; a mean humidity about the average; a mean rainfall rather above the average, falling on one day more than the average; a very unusual prevalence of easterly and deficiency of westerly winds, blowing also with unusual force.

November was characterised by a mean barometric pressure considerably under the average, with a monthly range much under it; a mean temperature a degree above the average, with a mean daily range a good deal above it; a high mean humidity; a mean rainfall greatly above the average, falling on two days more than the average; and a prevalence of south-easterly winds.

December was characterised by a mean barometric pressure rather under the average, with a monthly range considerably above it; a mean temperature very greatly above the average, with a mean daily range also

greatly above it; an unprecedentedly low mean humidity; a mean rainfall nearly the average, but falling on five days more than the average; and an extraordinary prevalence of winds from the west.

Tables XIII. and XIV. furnish means of comparing the months of 1898 with the corresponding months of the period 1881 to 1890, and of tracing the connection between the proportions of the gross annual mortality and the average temperature experienced during the decennium and the year under review. The lowest mean temperature of 1898 was during February and March, and the largest number of deaths are registered during the latter of these two months and during April. The smallest mortality occurs in July. On comparing the mean temperature of each month of 1898 with the corresponding period for the ten years, a considerable difference is found to be the case, and that to the advantage of the year under review. The mean temperature of 1898 is $47^{\circ}7$, that of the decennial period is $45^{\circ}8$, and the mean temperature of each month of the year 1898—with the exception of May, which is below it—is above that of the longer period, the mean for July being the same in each.

December	917	180	888	599	2,584	946
YEAR	12,993	2,382	10,486	6,912	32,773	12,000

Table XV. shows the connection between certain atmospheric phenomena and the death-rate from some diseases and classes of disease in the eight towns. Deaths from Miasmatics generally were registered in largest number during March, April, May, and June. Of these, Measles was most prevalent during April, May, June, and July, and, with the exception of Hooping-Cough, was apparently the most prevalent disease of the character during the year. Scarlet Fever is most noticeable during January and December; Hooping-Cough during April, May, and June—least so during the last two months of the year. The number of deaths from Diphtheria is greatest during October and November, least so during June. Diarrhœal affections, as usual, attain their maximum as causes of death during the summer and autumnal months of July, August, September, and October; while Fevers cause their largest mortality during the last four months of the year. A death from Small Pox was registered during April.

Phthisis is responsible for many deaths each month, but they were more pronounced during the earlier than during the later months of the year. Diseases of the Respiratory Organs, as Bronchitis and Pneumonia, being much influenced by climatic conditions, are, as a rule, most fatal during the cold and most inclement months, and we accordingly find the deaths from those at their maximum during the early and late months—*i.e.*, those in which the lowest mean temperature occurs. Deaths from diseases of the Circulatory Organs, Heart, &c., are registered in largest numbers during March, April, May, and July; and those from diseases of the Brain and Nervous System during January, March, April, May, June, September, and December.

Tables XVII. and XVIII. are designed to show the relative amounts of mortality experienced by persons of different ages in the above eight towns. Thus, in the case of children under five years of age, the months in which the largest number succumbed are August and September—the months following those in which Measles and Hooping-Cough caused many deaths, and in which the sequelæ from these same may be supposed to have a special fatal effect, besides being the two months in which diarrhœal affections claimed many lives.

Adolescents (those between 5 and 20 years) died in greatest proportion during February, March, April, June, and November; while September appears to have been the month of minimum mortality for persons of these ages.

Deaths of Adults (between 20 and 60 years) were registered in greater number during the earlier than during the later months of the year, the former being those in which the lowest mean temperature occurred, and persons of this age are, in the prosecution of their daily work, much exposed to the weather.

Aged persons, or those over 60 years, succumbed during much the same period as the latter, and no doubt for much the same reason.

The actual mortality among the entire population of these towns during the year 1898 was greatest in March, the next in order being April, May, June, September, February, August, October, January, November, December, and July.

REPORT

ON THE

VACCINATION OF CHILDREN

BORN IN SCOTLAND DURING 1897.

The Returns of Vaccination for the year 1897 show that, of the 129,014 children whose births were recorded in Scotland, 108,378, or 84·005 per cent., were successfully vaccinated. In 2945 cases certificates of postponement were granted, being at the rate of 2·283 per cent.; 569, or 0·441 per cent., were stated to have been insusceptible of vaccination from some constitutional peculiarity; 1, or 0·001 per cent., from having already

had Smallpox ; and 255, or 0·197 per cent., were insusceptible in respect of having been vaccinated, but by persons who were not qualified to grant certificates to that effect. 13,552, or 10·504 per cent., of the children born, died before vaccination, and 3314 children, or 2·569 per cent. of the whole, were removed from the district in which they were born, or from some other cause were unaccounted for. It thus appears that the number successfully vaccinated is below the average of the previous ten years ; that the proportion of postponed cases is above the average ; the number constitutionally insusceptible is above the average ; the number insusceptible from previous successful vaccination below the average ; and the numbers who died before vaccination, and who were removed from the district in which they were born, or in some other way unaccounted for, are both above the average.

Table XX. shows the proportions to the total number of living children, those who died before being vaccinated being omitted, and from this it will be seen that, of the 115,462 children alive at the age of six months, 108,378, or 93·865 per cent., were successfully vaccinated ; that of 2945 children, or 2·550 per cent., the vaccination was temporarily postponed ; 569 children were constitutionally insusceptible, being at the rate of 0·493 per cent., 1, or 0·001 per cent., from having already had Small-pox ; and 255, or 0·221 per cent., from being previously successfully vaccinated. 3314 children, or 2·870 per cent., were removed from the district in which they were born, or from some other cause were unaccounted for.

TABLE XX.—Vaccinations in Scotland, 1887–1897, deducting from the Births those who died before they could be Vaccinated, and giving the Proportion of the Vaccinated to the surviving Births of each year.

Years.		Successfully Vaccinated.	Vaccination Postponed.	Insusceptible of Vaccination.			Removed from District before Vaccination, or otherwise unaccounted for.	TOTAL LIVING.
				From Constitutional Insusceptibility.	From having had Small-pox.	From Previous Vaccination.

M.E.—Districts containing Parliamentary and Royal Burghs are printed in capitals, thus—EDINBURGH. Districts containing Towns of 2000 Inhabitants and upwards are printed in small capitals, thus—CARLUKE. An asterisk “*” is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more than one Parish, and the component parts of these Districts will be found on page 56.

A dagger “†” is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.

No. of District.	REGISTRATION DISTRICTS.	POPULATION.		BIRTHS, DEATHS, AND MARRIAGES, 1898.			VACCINATIONS, 1897.					
		Census 1881.	Census 1891.	Births.	Deaths.	Marriages.	Vaccination Postponed.	Insusceptible of Vaccine Disease.			Died before Vaccination.	Removed from District before Vaccination, or otherwise unaccounted for.
								On the ground of previous Successful Vaccination.	In respect of the Children having already had Small-pox.	On the ground of Constitutional Insusceptibility.		
59a	ROSS AND CROMARTY—continued.											Total Births for 1897.

† The Registration District of Middlebie was sub-divided as from 1st January 1898.

APPENDIX.

VACCINATIONS, 1897.

EXTRACTS FROM THE REGISTRARS' NOTES RELATIVE TO THE WORKING OF THE VACCINATION ACT.

I. NORTHERN DIVISION.

1. SHETLAND.

3. (2) SANDWICK AND CUNNINGSBURGH.—The case still outstanding is being dealt with.

2. ORKNEY.

23. ORPHIR.—The entry under Col. 7 is of a child whose parents removed to England, and of whom all trace has been lost.

4. SUTHERLAND.

49. (2) KINLOCHBERVIE.—Measles prevalent since August, and consequently vaccination work has been hindered.

53. LAIRG.—The parents of the two children unaccounted for have left the district and cannot be traced.

II. NORTH-WESTERN DIVISION.

5. ROSS AND CROMARTY.

Insular.

89. URG.—The cases entered under heading "Postponed" have mostly all been vaccinated, but, on account of stormy weather, certificates to that effect not received.

6. INVERNESS.

Insular.

111. (1) NORTH HARRIS.—Several of those entered in Col. 7 have been vaccinated, but certificates that the operation has been successfully performed have not yet been received.

113. NORTH UIST.—Some of those entered in Col. 7 have been vaccinated, though not yet certified.

114. (2) RAASAY.—Of the seven entered in Col. 7, some are vaccinated, although the vaccinator has not yet granted certificates.

118. (1) BENBECULA.—Sickness among children accounts for the six who are not yet certified to have been successfully vaccinated.

III. NORTH-EASTERN DIVISION.

9. BANFF.

149b. CABRACH.—The parents of the child removed from the district cannot now be traced.

167. SEAFIELD.—The prevalence of measles in the district accounts for the six postponed cases.

10. ABERDEEN.

222a. MIDMAR.—The child whose vaccination is stated to be postponed is believed to be now successfully vaccinated, although the Registrar has not yet got the certificate.

IV. EAST MIDLAND DIVISION.

13. PERTH.

330. AUCHTERGAVEN.—Change of medical officers sometimes causes delay, and accounts for the two cases entered in Col. 2.

373. LITTLE DUNKELD.—The two cases entered in Cols. 2 and 7 respectively will be completed very soon.

V. WEST MIDLAND DIVISION.

17. STIRLING.

484. KIPPEN.—No difficulty experienced in working the Vaccination Act. Only one child unaccounted for during the last 15 years, and that the child of a showman, which was born in a waggon passing through the parish.

19. ARGYLL.

Mainland.

525. (1) LISMORE.—The medical officer and parents do not care for vaccinating after the autumn and winter storms set in, but all children are vaccinated before they are two years old.

VI.—SOUTH-WESTERN DIVISION.

23. LANARK.

624. BLANTYRE.—A large number of those entered as unaccounted for have been vaccinated, but certificates to that effect not yet received.

VII. SOUTH-EASTERN DIVISION.

27. BERWICK.

736. EARLSTON.—The presence of measles and scarlet fever partly account for the seven cases of postponed vaccination.

29. SELKIRK.

775. GALASHIELS.—A very large number of families have left the district in consequence of the long and severe depression in the tweed trade, and in a number of cases no trace of their new domicile has been found.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES
BY AN ASTERISK (*).

[No.	Districts.	Component Parts (Parishes).
13	Birsay	Part of Harray and Birsay.
14	Deerness	Part of St Andrews.
18	Harray	Part of Harray and Birsay.
22	North Ronaldshay	Part of Cross and Burness.
26	Sanday	Lady, and part of Cross and Burness.
37b	Keiss	Parts of Canisbay and Wick.
58	Applecross	(1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch.
59b	Carnoch	Parts of Contin and Urray.
86b	Carloway	Parts of Barvas and Uig.
87	Lochs	Lochs, and part of Uig.
92b	Cannich	Parts of Kilmorack and Kiltarlity & Convinth.
112	Kilmuir	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort.
135	Elgin	Elgin, and parts of New Spynie, and St Andrews-Lhanbryde.
152	Enzie	Parts of Bellie and Rathven.
155b	Glenrines	Parts of Aberlour and Mortlach.
167	Seafeld	Parts of Cullen and Rathven.
171b	Ardallie	Parts of Cruden, Ellon, Longside, and Old Deer.
210b	Kinninmonth	Parts of Crimond, Longside, Lonmay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone, and part of Glenmuick, Tullich, and Glengairn.
222b	Millbren	Parts of Fyvie and Monquhitter.
227b	New Pitsligo	Parts of Abderdour, New Deer, Strichen, and Tyrie
231	Peterculter	(1) Parts of City Parish of Aberdeen and Peterculter; (2) Remainder of Peterculter.
237b	Savoch	Parts of Ellon, New Deer, Old Deer, and Tarves.
249b	Ythan Wells	Parts of Auchterless and Forgus.
266	Nigg	Part of City Parish of Aberdeen and Nigg.
282	Dundee	Dundee, and part of Liff, Benvie, and Invergowie.
294b	Kilry	Parts of Glenisla and Lintrathen.
324	Aberfeldy	Parts of Dull, Kenmore, and Logierait.
328b	Ardoch	Parts of Blackford, Dunblane, and Muthill.
330	Auchtergaven	*Parts of Auchtergaven and Logiealmond.
331	Balquhiddier	Balquhiddier, and part of Comrie.
344	Dowally	Part of Dunkeld & Dowally.
349	Dunkeld	Part of Dunkeld & Dowally.
355b	Foss	Parts of Blair-Athol and Dull.
361	Killin	Parts of Kenmore and Killin.
375	Logiealmond	Parts of Logiealmond, Little Dunkeld, and Methven.
379	Meikle	Meikle, and part of Coupar-Angus.
386b	Persie	Parts of Alyth, Blairgowrie, and Kirkmichael
387	Perth	Perth, and part of Kinnoull.
393b	Stanley	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathfillan	Part of Killin.
402	Tenantry	Parts of Blair-Athol and Moulin.
417	Anstruther-Easter	Anstruther-Easter, and part of Kiltrenny.
423	Crail	Part of Crail and May Island.
425	Dunbog	Dunbog, and part of Flisk.
425	Dunino	Dunino, and part of Crail.
442	Kirkcaldy and Abbotshall	Kirkcaldy, Abbotshall, and part of Kinghorn
481b	Grangemouth	Parts of Bothkennar, Falkirk, and Polmont.
488	St Ninians	St. Ninians, and part of Stirling.
496	Dumbarton	Dumbarton, and part of Cardross
505	Ardnamurchan	(1) Parts of Ardnamurchan, and Arisaig and Moldart; (2) Remainder of Arisaig and Moldart.
506	Ballachulish, etc.	Parts of Kilmallie, and Ardgour.
509	Camlodden and Minard	Parts of Glas-sary and Glenaray.
513	Inveraray	Inveraray, and part of Glenaray.
515	Kilbrandon and Kilechattan	Kilbrandon and Kilechattan, and part of Jura.
517	Kilchrenan, etc.	(1) Parts of Kilchrenan and Dalavich, and Glenorchy and Inishail; (2) Remainder of Kilchrenan and Dalavich.
520	Kilmallie,	Parts of Kilmallie, and Ardgour.
525	Lismore	Lismore and Appin, and part of Kilmallie.
526	Lochgilthead	Parts of Glassary and South Knapdale.
529	Muckairn	Parts of Archchattan and Muckairn, and Glenorchy and Inishail.
535	Tarbert	Parts of Kilmallonell, Saddell and Skipness, and South Knapdale.
536	Bowmore (or Kilarrow)	Part of Kilarrow and Kilmeny.
543	Kilmeny	Part of Kilarrow and Kilmeny.
545	Kinlochspelve	Part of Pennygown and Torosay.
547	Portnahaven	Part of Kilchoman.
548	Salen	Parts of Kilninian and Kilmore, and Pennygown and Torosay.
549	Tobermory	Part of Kilninian and Kilmore.
550	Torosay	Part of Pennygown and Torosay.
556	Lochranza	Parts of Kilbride and Kilmory.
559b	Bridge-of-Weir,	Parts of Houston and Killellan, and Kilbarchan.
572	Neilston	(1) Part of Neilston; (2) Remainder of Neilston, and part of Abbey.
576	Ardrossan	(1) Parts of Ardrossan and West Kilbride; (2) Remainder of Ardrossan.
584b	Crosshill	Parts of Kirkmichael, Kirkoswald, and Maybole.
595	Irvine	Irvine, and part of Dundonald.
610b	Patna	Parts of Dalmellington, Dalrymple, Kirkmichael, and Straiton.
626b	Calderhead	Parts of Cambusnethan and Shotts.
644	Glasgow	City of Glasgow, Gorbals, and parts of Barony, and Govan.
693	Liberton	Parts of Liberton and Inveresk

CONSTITUTION OF THE DISTRICTS—*continued*.

No.	Districts.	Component Parts (Parishes).
695b	New Craighall, . . .	Parts of Inveresk and Liberton.
698b	Stobhill	Parts of Borthwick, Cockpen, and Newbattle.
774a	Caddonfoot	Parts of Galashiels, Innerleithen, Selkirk, Stow, and Yarrow.
787b	Edgerston	Parts of Jedburgh and Southdean.
813b	Brydekirk	Parts of Annan, Cummertrees, and Hoddum.
830	Holywood	Holywood, and part of Terregles.
853b	Wanlockhead	Part of Sanquhar.
857b	Bargrennan	Parts of Minnigaff (Kirkcudbright) and Penninghame (Wigtown).
862	Corsockbridge	Parts of Balmaclellan, Kirkpatrick-Durham, and Parton.
884	Dalbeattie	Part of Urr.
899	Stranraer	Stranraer, and parts of Inch and Leswalt.

LIST of REGISTRATION DISTRICTS which include BURGHS, or TOWNS of 2000 Inhabitants and upwards, or *parts thereof*, bearing a different name from the District in which they are situated.

Ardclach, . . 120		Bridgeton, . . 644	Carrington, . 675	Cranston, . . 680
Ardersier, . . 91		Brodick, . . . 553	Carsphairn, . 860	Crathie, . . . 183
		Broughton, . . 758	Castleton, . . 784	Crawford, . . . 635
			Cathcart, . . . 560	Crawfordjohn, . 686
			Catrine, . . . 613	Creich (Fife), . 418
			Cavers, . . . 785	Crichton, . . . 681

* The actual number of Districts is 1071—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 6 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place compound names in the order in which they are pronounced.

Criech (Sutherland), . . .	46	Dunbog, . . .	423	Flotta, . . .	32	Greenock, . . .	564	Kettle, . . .	435
